

Master Prompt for Figma Make — "PromptVault" Web App

Copy the entire prompt below into Figma Make. The structured sections give the AI everything it needs to build the UI and UX accurately.

PROJECT BRIEF

Build a modern, minimal web application called **PromptVault** — an AI prompt library and live preview playground. Users write or paste a prompt on the left, hit **Run**, and see the generated output on the right. A bottom tab bar lets them switch between six output modes: **Image, Video, Text, Content, Code, Compare**.

The aesthetic should feel like a premium Apple-inspired SaaS tool: lots of whitespace, soft shadows, rounded corners, a single floating "hero" prompt card, and clean sans-serif typography.

LAYOUT & STRUCTURE

Viewport: 1440 × 900 desktop, fully responsive down to tablet (768px).

Overall composition:

- Faux browser chrome at the top (decorative, gives a "demo screenshot" feel)
- Two-column main area (50/50 split): Prompt Editor (left) | Preview Canvas (right)
- Centered tab bar at the bottom

Page background: very light lavender / off-white ().

1 TOP BROWSER BAR (mock chrome)

- Height: **56px**, background (□ #FFFFFF), bottom border (1px #ECECEC)
 - **Left side:** three traffic-light dots — red (● #FF5F57), yellow (● #FFBD2E), green (● #28C840), each 12px, 8px gap
 - **Center:** pill-shaped URL bar — 240px × 34px, background (□ #F4F4F4), radius 17px
 - 4-pointed red starburst icon (● #FF3B30) on the left
 - Text: (promptvaultt.app / image) — 14px, color (● #3A3A3A), font-weight 500
 - **Right side:** three small circles — blue, red, yellow (Google-account style), 10px each
-

2 LEFT PANEL — PROMPT EDITOR

- Background: (□ #F8F8F8)
- Padding: 48px
- Vertical layout

Section label

- Text: (PROMPT)
- Style: uppercase, 13px, letter-spacing 1.5px, weight 600, color (● #1A1A1A)
- Position: top-left

Floating Prompt Card (the hero element)

- Width: ~300px, auto height
- Background: (□ #FFFFFF), radius **20px**
- Padding: 36px 32px

- **Multi-layer shadow** for floating depth:
 - `0px 24px 48px rgba(0,0,0,0.10)`
 - `0px 4px 12px rgba(0,0,0,0.05)`
- Slightly rotated `-2deg` for a playful tilted feel
- Position: offsets ~80px down from the PROMPT label, slightly overlapping the right panel edge

Inside the card:

- Large decorative opening quote `"` in the top-left corner — 56px, bold black `#0A0A0A`
- Prompt text, center-aligned:

A cinematic event poster, dramatic rim lighting, bold typography — ar 2:3

 - Font: Inter / SF Pro, 19px, weight 600, color `#1A1A1A`, line-height 1.4
- Large decorative closing quote `"` in the bottom-right corner — 56px, bold black

Action Buttons (below card, 40px gap)

Horizontal row, 12px gap between buttons:

Run button (primary)

- Background: `#1F6FEB` (vibrant blue)
- Label: `Run`, white, 15px, weight 600
- Icon: filled play triangle `▶` (white, 14px), 8px before label
- Padding: 12px 22px
- Radius: 12px
- Shadow: `0px 4px 12px rgba(31,111,235,0.25)`

Copy button (secondary)

- Background:
 - Border: 1px solid
 - Label: , color , 15px, weight 500
 - Icon: two overlapping squares (copy glyph), 14px, color , 8px before label
 - Padding: 12px 22px
 - Radius: 12px
-

3 RIGHT PANEL — PREVIEW CANVAS

- Background: full-bleed image preview, radius 16px on the inside corners
- For the mock, use a **cinematic concert image** (crowd silhouettes, stage lights blasting from behind, falling confetti, warm orange rim light) — this matches the prompt example
- Image covers entire right half edge-to-edge

Bottom-left overlay:

- Small play triangle ▶ + text
 - White text, 13px, weight 500
 - 20px from bottom, 24px from left
 - Subtle text shadow for legibility
-

4 BOTTOM TAB BAR

- Background , top border
- Padding: 18px 0
- Centered horizontally
- Six tabs in a row, gap 36px between each

- Each tab = icon (18px) + label below or beside, 8px gap

Tab list (left to right):

Tab	Icon	State
Image	photo / mountain glyph	ACTIVE — icon red (● #E63946), label (● #1A1A1A), 3px red underline below
Video	play-in-square	inactive
Text	three horizontal lines	inactive
Content	grid / spreadsheet	inactive
Code	(</>) glyph	inactive
Compare	two diverging arrows	inactive

- Inactive tabs: icon + label in (● #6B7280), weight 500, 14px
- Active tab: 3px red underline (● #E63946), sits 6px below label, width matches label

GLOBAL DESIGN TOKENS

Colors

- (--bg-page: #EFEF5)
- (--bg-panel: #F8F8F8)
- (--surface: #FFFFFF)
- (--text-primary: #1A1A1A)

- `--text-secondary: #6B7280`
- `--border: #E5E5E5`
- `--primary: #1F6FEB`
- `--accent-red: #E63946`
- `--star-red: #FF3B30`

Typography

- Family: Inter, SF Pro Display, system-ui (sans-serif)
- Display/labels: 13-14px, weight 500-600, uppercase tracking on section labels
- Card prompt text: 19px, weight 600
- Buttons: 15px, weight 500-600
- Tab labels: 14px, weight 500

Spacing

- 8px grid
- Card radius: 20px • Button radius: 12px • Image radius: 16px
- Standard panel padding: 40-48px

Shadows (use these consistently)

- Floating card: `(0 24px 48px rgba(0,0,0,0.10), 0 4px 12px rgba(0,0,0,0.05))`
- Buttons: `(0 4px 12px rgba(31,111,235,0.25))` (primary only)
- Subtle hover: scale 1.02, shadow intensifies 10%

🌟 INTERACTIONS & UX

1. **Tab switching** — clicking a tab swaps the right-panel preview with a smooth 250ms cross-fade. Each mode has its own preview UI:

- **Image** → static generated image (current state)
 - **Video** → video player with timeline scrubber
 - **Text** → typed-out text in a styled output card
 - **Content** → structured cards / list view
 - **Code** → syntax-highlighted code block with a copy button
 - **Compare** → split-screen before/after with a draggable divider
2. **Run button** — on click, plays a 600ms shimmer/loading state on the preview, then reveals the new output. Button briefly shows a spinner.
 3. **Copy button** — copies the prompt text to clipboard, shows a 2-second toast: .
 4. **Prompt card** — clicking inside makes the text editable inline. Card grows to fit content. Quote marks remain fixed in corners.
 5. **Hover states** — buttons gain 10% deeper shadow and lift 2px; tabs underline grows from 0 to full width on hover.
 6. **Loading state** — preview area shows a skeleton shimmer (gradient sweep) while generating.
 7. **Empty state** — if prompt is blank, card shows a soft gray placeholder: .
-

RESPONSIVE BEHAVIOR

- **Tablet (≤1024px):** stack panels vertically — prompt editor on top, preview below. Tab bar stays at bottom.
 - **Mobile (≤640px):** prompt card becomes full-width, action buttons stack, tab bar becomes scrollable horizontally.
-

COMPONENT INVENTORY (for Figma component library)

Build these as reusable components:

1. `BrowserChrome` (top bar with traffic lights + URL pill)
 2. `PromptCard` (white card with quote marks + editable text)
 3. `Button` (with `variant: primary | secondary`, `icon: optional`)
 4. `Tab` (with `icon`, `label`, `active: boolean`)
 5. `TabBar` (container holding 6 Tab components)
 6. `PreviewCanvas` (image / video / text / etc. variants)
 7. `Toast` (success / error notifications)
-

FINAL NOTES FOR FIGMA MAKE

- Prioritize **whitespace and breathing room** over information density
- Keep the **floating prompt card** as the visual hero — it should pop off the page
- Match the soft, premium feel of tools like Linear, Vercel, and Apple's product pages
- Use **smooth motion** (200–300ms cubic-bezier easing) for all state changes
- The page should feel like a **showcase / demo** more than a traditional dashboard

Build it production-ready, with clean component naming, auto-layout everywhere, and a token-based color & typography system.
